

# CALL FOR PAPER

ENVIRONMENT CONSERVATION JOURNAL welcomes submissions to the special issue on **ALL ASPECTS OF ZOOLOGY**. Zoology, the branch of biology that studies the members of the animal kingdom and animal life in general includes both the inquiry into individual animals and their constituent parts, even to the molecular level, and the inquiry into animal populations, entire faunas, and the relationships of animals to each other, to plants, and to the nonliving environment. Though this wide range of studies results in some isolation of specialties within zoology, the conceptual integration in the contemporary study of living things that has occurred in recent years emphasizes the structural and functional unity of life rather than its diversity.

**Potential topics include but are not limited to:**

- **FISH AND FISHERIES**
- **ENTOMOLOGY**
- **ARACHNOLOGY**
- **ARCHAEOZOOLOGY**
- **EMBRYOLOGY**
- **CETOLOGY**
- **HELMINTHOLOGY**
- **ANIMAL PHYSIOLOGY**
- **ZOOGRAPHY**
- **COMPARATIVE ZOOLOGY**
- **SOIL ZOOLOGY**
- **MAMMALOGY**
- **COMPARATIVE ANATOMY**
- **HERPETOLOGY**
- **ANIMAL PHYSIOLOGY**
